

# Endpoint Access Manager

Top 100 Law Firm Protects Data with Endpoint Security Software

Legal Services | Portable Device Management & Data Protection | Control Guard

## Duane Morris®

Duane Morris LLP, among the 100 largest law firms in the world, is a full-service firm of more than 600 lawyers. In addition to legal services, Duane Morris has independent affiliates employing approximately 100 professionals engaged in other disciplines. With offices in major markets, and as part of an international network of independent law firms, Duane Morris represents clients across the United States and around the world.

Unauthorized transactions are blocked, monitored and communicated in real time to management consoles.

The solution shields the network from malware copied to endpoints and secure networks from exposure to the outside world through wireless modems, WiFi, Bluetooth and other interfaces.

## Results

Secured eDevice currently manages the secure use of removable media and portable devices for Duane Morris' more than 1,350 lawyers, legal professionals and staff. "Being one of the country's top law firms, Duane Morris deals with a large amount of very sensitive data," said John Sroka, CIO at Duane Morris. "Securing the data and preventing information leakage is high on our priority list. Cryptzone's technology enables us to manage the use of removal media and block unauthorized access." Cryptzone's Endpoint Access Manager helps Duane Morris every day by protecting against information leakage via iPods, CDs, thumb drives, and the like. "This not only locks down ports, it gives us reports and the ability to watch for abnormal activity," said Sroka. Duane Morris estimates that the solution is saving company time, money, resources and possibly their entire livelihood when weighed against the infinite but realistic threats that exist in today's environment.

*"Cryptzone technology enables us to manage the use of removal media and block unauthorized access."*

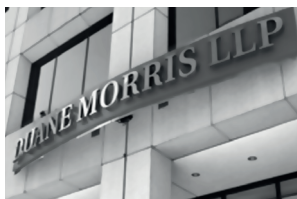

## The Challenge

Duane Morris LLP, one of the largest 100 law firms in the United States, recognized the wide array of security risks associated with the increasing use of removable media and portable devices, like thumb drives, CDs, iPods and cell phones. With the rise of data theft scandals plaguing corporate America, and the fact that all of its employees are using these devices, Duane Morris did not want to take any chances. Duane Morris set out to find a proactive solution that would secure the use of portable devices, significantly mitigating potential breaches of security.

## The Solution

Duane Morris chose Secured eDevice from Cryptzone to secure critical information residing on its desktops and laptops.

The hosted software solution allows Duane Morris to centrally control, monitor and record how data is uploaded and downloaded from removable media and portable devices to desktop and laptop computers.
