

Anders Hansson

Anders Hansson is the CTO and head of development for Cryptzone, part of Swedish company The Cryptzone Group. Anders has been part of the company since 2003 when it was founded as Secured eMail and has been instrumental in developing the technology and content security concepts that underpin Cryptzone's user friendly solutions.

Anders is passionate about development methodologies, tools and processes. He started programming systems more than 25 years ago and hosted programming courses in assembly in his early teens. During his career he has held several management positions and developed particular expertise in engineering and security. Prior to joining Cryptzone he was lead developer at e-learning specialists Intermezzon, and also co-founded the IT consultancy company Novoskill.

Since joining Cryptzone Anders has lead the development of the unique technology behind Cryptzone's visionary security platform and has a number of technology patents and patents pending to his name.
