

Tomas Olovsson

Tomas Olovsson is Chief Technology Officer of AppGate Network Security, part of Swedish company The Cryptzone Group, and is responsible for the development of AppGate product strategies. Olovsson co-founded AppGate in 1999. He also has a position as an associate professor at Chalmers University of Technology in Gothenburg specializing in networks, communication and security.

Olovsson has more than 25 years of experience in the IT industry and has been working actively with computer security since 1990 both in industry and in academia. He has a Master's Degree in Engineering Physics and a PhD in Computer Engineering in which he focused on computer security for distributed systems and measurement of operational security. Today at Chalmers University he is responsible for courses in computer communications and network security. He is also program director for the Networks and Distributed Systems Masters program and has many publications in scientific journals and books about computer security.

Prior to this, Olovsson has been a consultant, chief designer, project manager, founder and executive of several technology companies in Sweden. He also worked for two years as a consultant for AGS Information Services in the US.
