

Cryptzone goes public

Gothenburg 4th February – Cryptzone’s Founders Rami Avidan and Peter Davin rang the bell to open trading at OMX headquarters in Stockholm today. The data leak prevention provider debuted on the public market at SEK 5, 25 a share.

“As the leading data leak prevention provider in the Nordics, this is a major step for Cryptzone's development, and we are very happy to offer new investors the chance to participate in the company's future growth.” says Peter Davin, Co-Founder of Cryptzone.

“We are delighted with the positive response that we have received from a broad range of investors.” states Rami Avidan, Co-Founder of Cryptzone. “The demand for encryption products worldwide is growing rapidly and our ability to provide a centrally managed approach with a modular architecture that offers interoperability, scalability and simplicity has proved attractive to customer, partners and investors.” Cryptzone’s award winning Simple Encryption Platform (SEP) provides a central enterprise encryption framework for shared user management, policies, key management and content monitoring services. The solution is currently used by recognized organizations such as NCC, Dialect and Östgöta Brandstodsbolag - Länsförsäkringar.

The company is now trading under the symbol "Czon B"

The company has hired Thenberg & Kinde Fondkommission AB as the Certified Adviser

About Cryptzone:

Cryptzone is a recognized leader in data leak prevention solutions that secure data at rest and in transit by applying the industry strength Simple Encryption Platform (SEP). Cryptzone provides security solutions that people and companies actually can and will use, thereby increasing the overall data protection and minimizing data leaks. Cryptzone secures email, files, folders, disks, USB sticks and mobile terminals without forcing users to change the way they work, while giving IT departments’ central control of user rights. The company has offices in Gothenburg, Sweden, New York, US, and Munich, Germany.
