

Alcatel-Lucent selects Cryptzone for data leak prevention

Gothenburg 14th February 2008 – Cryptzone, the Nordics leading data leak prevention provider, today announces that Dunkermotoren, a division of Alcatel Lucent, one of the world's biggest industry players in telecommunications, has deployed Cryptzone's Simple Encryption Platform (SEP).

Dunkermotoren has supplied quality drives to a multitude of industries and markets including office equipment, instrumentation, mechanical handling, optical systems, construction industry and medical technologies for over 50 years. Outstanding quality, reliability and security are their primary objectives which made Cryptzone's solution the obvious choice.

"We are pleased that Alcatel Lucent - an industry leader - has selected Cryptzone to protect their critical information." said Martin Starzmann, VP Sales for the DACH region at Cryptzone. "Having one of the most well-respected telecommunications organizations choosing our technology reflects growing recognition of the strength of our solutions, and we feel confident that they will continue to extend the use of our encryption solutions across many more business processes in the future and become a key account for us."

Rami Avidan, COO of Cryptzone says, "We are beginning to see an increase in the amount of European companies that are aware of the security risks with mobile data and unencrypted emails, and that appreciate our Simple Encryption Platform to quickly and easily meet their security requirements. With companies under increased scrutiny when it comes to the security of customer and employee data, they are increasingly turning to proven solutions from Cryptzone to ensure that sensitive data is kept secure."
