

Dutch Medical Center implements Cryptzone Solution

Gothenburg, 28 March 2008 - Cryptzone, the Nordics leading Data Leak Prevention provider, today announced that Leiden University Medical Center has signed a contract to deploy Cryptzone's Secured eMail solution.

Leiden University Medical Center (LUMC) is strongly committed to ongoing improvement in health care quality and intends to play a leading role in this field at both national and international level. Its core activities are research, patient care, education and post graduate training.

Cryptzone will provide the medical center with its email encryption service which is part of their Simple Encryption Platform. Security and confidentiality are of the utmost importance for LUMC which is why Cryptzone was the perfect complement to their existing stringent security measures.

"We are very pleased that LUMC have chosen Cryptzone to protect their confidential information", says Rami Avidan, COO & Co-Founder. "When leading medical organizations select and deploy our solution, it validates the quality and confidence placed in our company and products."

"Many healthcare organizations are under pressure to implement new security technologies and stay within budget to meet data privacy regulations. Cryptzone eases the burden by simply adding an extra layer of security over the existing infrastructure allowing organizations to easily meet security demands without the high price tag", says Therese Braun, Partner & Sales Manager for Benelux at Cryptzone.

About Cryptzone:

Cryptzone is a recognized leader in data leak prevention solutions that secure data at rest and in transit by applying the industry strength Simple Encryption Platform (SEP). Cryptzone provides security solutions that people and companies actually can and will use, thereby increasing the overall data protection and minimizing data leaks. Cryptzone secures email, files, folders, disks, USB sticks and mobile terminals without forcing users to change the way they work, while giving IT departments' central control of user rights. The company has offices in Gothenburg, Sweden, New York, US, and Munich, Germany.
