

# AppGate SDP Security Advisory

ID: 2018-07-0001

First published 2018-07-12

Last updated 2018-07-12

## Title

Information Disclosure via Management Interface.

## Summary

Management Interface does not properly clean up browser cache during sign-out. Cached data contains read-only configuration information, does not contain credentials.

## Severity

Low

## Products Affected

AppGate SDP Controller versions 4.0.0 through 4.0.3 are affected.

AppGate Classic server is not affected.

## Suggested Action

Upgrade AppGate SDP Controllers to version 4.0.4 or later. As a best practice, do not use shared computers to access Management Interface.

## Workaround and Mitigations

Local browser cache is only valid as long as the browser tab is open. After signing out, closing the tab or refreshing the page clears the cache.
