

AppGate SDP Security Advisory

ID: 2018-11-0001

First published 2018-11-22
Last updated 2018-11-22

Title

Privilege Escalation on AppGate SDP Client for Windows

Summary

A malicious user with elevated rights on a client host could use AppGate SDP Client updater to further escalate privileges locally.

Severity

Low

Products Affected

AppGate SDP Clients for Windows versions between 4.1.0 and 4.1.2 are affected.

Suggested Action

Upgrade AppGate ate SDP Clients for Windows to version 4.1.3 and above.

Workaround and Mitigations

Attack requires write permissions on protected directories and reboot permissions on the client host, so it is applicable to already compromised hosts. It's important to follow best security practices on Windows accounts.
