

AppGate Classic Security Advisory

ID: 2017-06-0001

First published 2017-08-15
Last updated 2017-08-15

Title

Shell access and Information disclosure.

Summary

An authenticated user could gain shell access on the AppGate Classic server and disclose system information to further escalate privileges on the server.

Severity

Medium

Products Affected

AppGate Classic server with a version before 11.2.7.
AppGate (formerly known as AppGate XDP) is not affected.

Suggested Action

Upgrade AppGate Classic servers to version 11.2.7 or later.

Workaround and Mitigations

A second factor for authentication makes it much harder for an adversary to authenticate himself with stolen credentials. If you cannot upgrade to 11.2.7 or later please contact support.
